

Filing patents and trademarks

We receive hardcopy industrial property applications for patents, inventions, industrial designs and business trademarks, both nationally and internationally. The applications are digitalised and passed on to the Italian Patent and Trademark Office (UIBM), which issues the relevant patent certificates. Direct online filing to the UIBM is also possible. As a licensed Patent Information Point (PIP), we provide information and assistance on the protection of industrial property. We conduct trademark and patent clearance searches, even for patents filed around the world. Finally, we provide instructions on filing European and international patents (PCT).
